About Human Care Group

Human Care Group produces and provides walking aids, safe patient handling products, healthcare beds, medical equipment, and furniture.
We improve freedom of movement and quality of care for millions of people around the world. Our vision is that our products become a natural part of life for those who need them by offering innovative solutions with every detail in mind.

Since the foundation in Sweden in 1993, we have continuously grown and are today a global company. Our headquarter is located in Stockholm, Sweden, and we have offices in the US, Canada, Germany, the Netherlands, and in Turkey. With an extensive network of partners and distributors, our products are represented worldwide. The Human Care Group consists of the Human Care companies, Petermann and Kenmak. Together we offer products divided into the following areas; Walking Aids, Lifting Solutions, Manual Transfers, Convertible Chairs, Hygiene, Healthcare Beds, Medical Equipment, and Furniture.

For us, safety, quality, usability, and sustainability are paramount. In every detail, in every aspect.

Your life. Your way.

Lifting Solutions

Cosmos
Innovation with simplicity in focus.

reddot winner 2024

"The Cosmos ceiling lift boasts a well-thought-out design that simplifies the daily tasks performed by caregivers."

- Motivation of the Reddot Design jury

- Easy to install.

- Lithium battery.

- The modular design on the inside makes replacing parts quick and simpleduring service.

- Compatible with several existing rail systems.

- Developed according to the latest ISO standard - ISO 10535:2021.

- Optimized for storage and shipping.

Innovation with simplicity in focus.

The Cosmos has been developed to be used in humid and wet environments. The central unit has a very high resistance to humidity (IP25), and the hand control is fully water-resistant (IP27).

A unique Quick Connection System that makes it easy to attach and detach the lift from the rail roller and change the Cosmos hanger bars and distance straps.

Small and light with an integrated handle, making it easy to carry.

Cosmos, the new ceiling lift with dual functionality

Can be used both as a stationary and portable ceiling lift

reddot winner 2024

Our latest ceiling lift, the Cosmos, was designed and developed with a focus on high quality, cost of ownership, and ease of use. We involved multiple stakeholders, such as caregivers, clients, service technicians, and management to ensure that the lift was all-encompassing of their respective needs. This new lift is light and compact with dual functionality of both a portable and stationary lift—simplicity at its best.

Rail Systems and Rail Rollers

We offer a full range of rail systems, including rail rollers, for the majority of rails on the market. The rail system can be easily adapted to the patient's needs and safely installed regardless of the room's layout and the building's structure. Both single rail systems and traverse systems can be created.

Convertible Chairs

Our Barton convertible chairs belong to a range of safe and comfortable devices, ideal for acute care settings. They can just as easily function in a home care or nursing facility setting. Any of our convertible chairs should be a key element in early patient mobilization with the added benefits of caregiver safety.

H-250

Barton H-250 is our smallest version of the Convertible Chair, suitable for home use. SWL 113 kg / 250 lb

Art nr: B1002-BL

I-400

The I-400 chair is a safe and comfortable device ideal for institutional care. SWL 181kg / 400lb

Art nr: B1041-TS-GEL

I-400x

I-400x is most suitable for institutional care. It is height adjustable, and has a forward tilt to simplify getting out of the chair. SWL 181kg / 400lb

Art nr: B1042-TS-GEL

I-700

With its higher weight capacity, I-700, allows easy transfer for the heavier client. SWL 318kg / 700lb

Art nr: B1071-TS-GEL

Patient Transfer System

Our Patient Transfer System works with the Convertible Chairs and most beds and stretchers. It allows a single caregiver the ability to safely and easily transfer and reposition a patient in the supine position with dignity and comfort.
